

Toyota Land Cruiser

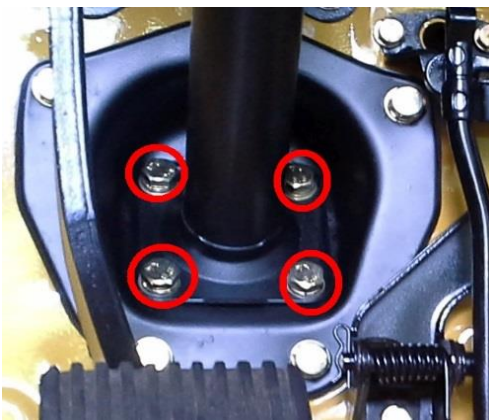

Check first the year of manufacture and select the correct product name of the EZ-unit.

Toyota Land Cruiser built until 1972

EZ electric power steering needs to assemble the column or deliver EZ-unit with adaptors? -> product name of EZ-unit =

Toyota Land Cruiser 58-72 1 piece LHD

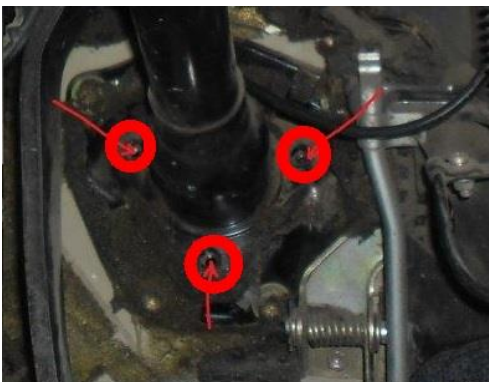

Toyota Land Cruiser built from 1972 until 1981 (4 hole flange):

-> product name of EZ-unit =

Toyota Land Cruiser 72-81 (4 hole flange) LHD or RHD

Toyota Land Cruiser built from 1981 (3 hole flange):

-> product name of EZ-unit =

Toyota Land Cruiser 81> (3 hole flange) LHD or RHD

The product name of EZ-unit you want to order:

Additional information:

Our EZ units are designed to work with 12V and negative earth systems. On a 24V vehicle we have the option to (retro)fit a converter. This converter will balance the load over both 12V batteries. This way the batteries will have a longer life span in comparison with the option of just using one battery to achieve the 12V needed for the system.
